^P Weekly published data are provisional.

¹ This data is based on registrations of deaths, not occurrences. The majority of deaths are registered within five days in Northern Ireland.

² Respiratory deaths include any death where terms directly relating to respiratory causes were mentioned anywhere on the death certificate (this includes Covid-19 deaths). This is not directly comparable to the ONS figures relating to 'deaths where the underlying cause was respiratory disease'.

³ Covid-19 deaths include any death where Coronavirus or Covid-19 (suspected or confirmed) was *mentioned anywhere* on the death certificate.
